

May 26, 2017

Dear Parents/Guardians:

Students have been working on their science fair project since March. Over the course of this time they have completed various assignments. The most important of these was deciding a topic. Once a decision was made, the students developed a proposal, which encouraged them to explore the materials and procedures that would be necessary to complete the project. Following the proposal, students researched concepts or processes for their project and compiled the findings into a Background Research paper.

Most recently, students should have performed their experiment and gathered data. Over the course of the past few weeks, students have completed a few more components and compiled them into a notebook and poster. As a finale, we will be holding the Science Fair on **Monday, June 5, 2017** in the cafeteria from **9:00 a.m.- 10:20 a.m.** We cordially invite you to attend the event so that you can view the wonderful final products. I know that all our students have put in a great deal of time, as well as effort, and they are very proud of their projects!

Thanks so much,

Mr. Breau and Mr. Farnsworth
